### **Château Miraval - A magical site in the heart of Provence**

Dating from pre-Roman times, Miraval is approached down a long winding lane through woods and vineyards with dramatic glimpses of the distant "Gros Bésillon" mountain through the trees. The magnificent cascading stone-walled terraces are now replanted with thirteen different varieties of olives. Water seems to be everywhere flowing; from fountains; along aqueducts; through hidden tunnels; into the moat and filling the lake.
