

California

Nebbiolo-Hillside Collection

El Dorado

Nebbiolo

The History

The Madrona wine all started by a pioneer who found an exceptional landscape that is divestible to the hillside vineyard, which was located in El Dorado, California in 1973. It was originally founded by the Senior Bush who wanted to create this unique wine that has great acidity with perfect balance to create this comfort when drinking the wine. This authentic wine was discovered from a 350 year old Madrona tree, which represented the location to grow the best terroir of the Madrona vineyards. These Madrona trees are found in the greatest growing regions through El Dorado, Sierra Foothills AVAs.

The Grape

79% Nebbiolo, 20% Barbera, 1% Merlot

Tasting Note

The color, with its more brickish hue, is the first tell-tale sign. The second is the classic aromas of ripe plum, dried fruit (figs), pipe tobacco, and a myriad of spices. The nose is intriguing and inviting, just daring the senses to taste the wine. With its higher pH (generally a “terroir” aspect of our high-elevation Nebbiolo vineyards), the first sip just envelops the entire palate.
