

California

Cabernet Franc—Signature Collection

El Dorado

Cabernet Franc

The History

The Madrona wine all started by a pioneer who found an exceptional landscape that is divestible to the hillside vineyard, which was located in El Dorado, California in 1973. It was originally founded by the Senior Bush who wanted to create this unique wine that has great acidity with perfect balance to create this comfort when drinking the wine. This authentic wine was discovered from a 350 year old Madrona tree, which represented the location to grow the best terroir of the Madrona vineyards. These Madrona trees are found in the greatest growing regions through El Dorado, Sierra Foothills AVAs.

The Grape

92% Cabernet Franc, 4% Cabernet Sauvignon, 3% Merlot, 1% Malbec

Tasting Note

The aromas are like a spice cabinet out in a dense forest. An intriguing umami essence of savory spice, soy sauce and forest floor earthiness fill the glass while sweet spice (cinnamon) lingers behind. The first sip of the wine, though, shows how truly complex and interesting Cabernet Franc is. Rich and rounded, the entry has this elegant violet and lavender expression (from the older vines) marrying with the black cherry of the newer clones.
