

California

Cabernet Sauvignon—Signature Collection

El Dorado

Cabernet Sauvignon

The History

The Madroña wine all started by a pioneer who found an exceptional landscape that is divestible to the hillside vineyard, which was located in El Dorado, California in 1973. It was originally founded by the Senior Bush who wanted to create this unique wine that has great acidity with perfect balance to create this comfort when drinking the wine. This authentic wine was discovered from a 350 year old Madrona tree, which represented the location to grow the best terroir of the Madrona vineyards. These Madrona trees are found in the greatest growing regions through El Dorado, Sierra Foothills AVAs.

The Grape

90% Cabernet Sauvignon, 10% Merlot

Wine Note

The aromas are complex and thought-provoking as great Cabernet should be. The myriad of dark berry fruit characters, sachets of fresh herbs and hints of smokiness meld together while the vanilla tones of new French oak (43%) bind them all together. The palate is big and bold yet refined and elegant, showcasing the wonderful balance of mountain-grown fruit and the plentiful sunshine we have in the area. Black currant and dark cherry explode on the entry carrying the fruit long into the mid-palate.
