

California

Madrona Chardonnay Hillside Collection

El Dorado

CHARDONNAY

The History

The Madrona wine all started by a pioneer who found an exceptional landscape that is divestible to the hillside vineyard, which was located in El Dorado, California in 1973. It was originally founded by the Senior Bush who wanted to create this unique wine that has great acidity with perfect balance to create this comfort when drinking the wine. This authentic wine was discovered from a 350 year old Madrona tree, which represented the location to grow the best terroir of the Madrona vineyards. These Madrona trees are found in the greatest growing regions through El Dorado, Sierra Foothills AVAs.

The Grape

100% Chardonnay

Tasting Note

Madrona Chardonnay is an elegant and complex wine with no one aroma or flavor dominating. Traditional Burgundian barrel fermentation is neatly married with cool tank fermentation, both of which are kept 'sur lie' un l close to bottling. The selected level of malolactic secondary fermentation de pends on the vintage -- the goal always being a wine exhibiting exceptional acid balance and a crisp, lingering finish.
